

I'm Sam Shariat.

I'm a Vancouver based Web/App Developer. I've been working as a Programmer for +8 years, My preferred framework is ReactJS, I use it to develop Web/Desktop/Mobile Apps as PWA and Native Apps. I'm also open to other languages and frameworks.

About Me

I'm trying to engage in projects which will bring more life energy into human beings, Also would be happy to help as much as I can, Also I am running an startup which is based on planting tree's , helping the climate to be at a better phase, better atmosphere for everything to grow and blossom

This guy is awesome. Just finished work in time and cooperated really well. Very fast and understands requirement quite well. Good work, keep it up :)

— Raja K - Freelancer.com

He did his job good and worked as required . I recommend this freelancer !

— Andy A - Freelancer.com

Sam stands out in having both deep AS3 and PHP knowledge as well as broad practical programming skills across multiple languages and technologies. Sam focused on creating a system that would allow the flash to communicate with a domain hosting service. I look forward to future opportunities to work with Mojtahed again.
